Summary

Engineering graduate with hands-on experience in backend development, database programming, and business application development. Proficient in Java, SQL, Spring Boot, RESTful APIs, and MS SQL Server, with experience developing business logic, optimizing database operations, and building scalable application modules. Strong foundation in Data Structures and Algorithms with a keen interest in developing reliable and efficient software solutions.

Skills Summary

- Programming Languages: Java, SQL
- Technologies: React, Spring Boot, Tailwind CSS, RESTful APIs, JDBC
- Developer Tools: MS SQL Server, Visual Studio, Git/GitHub, PostMan
- AI: Python, Foundations Of AI, Generative AI, LLMs
- Knowledge: Data Structures and Algorithms, Networking Fundamentals (Cisco), Linux, IoT

Education

- BE (Hons.) - Electronics and Communication Engineering & Honors in AI CGPA: 8.34
IFET College Of Engineering, Villupuram, Tamil Nadu Nov 2022 - May 2026

Experience

iSPIDER SOFTWARE SOLUTIONS

Software Developer Trainee

Puducherry

June, 2026 – Aug, 2026

- Developed and maintained backend business logic for a payroll management software product using MS SQL Server.
- Created and optimized SQL queries, stored procedures, and database objects to support payroll processing, reporting, and system performance.

Projects

- **IOT-BASED SEWAGE GAS MONITORING SYSTEM (ESP32, MQ Sensors, React, REST API) [Url](#):**
Developed an IoT-based Sewage Gas Monitoring System using ESP32 and MQ sensors.
Built a custom IoT cloud and real-time dashboard to collect, monitor, and visualize sensor data remotely.
Designed REST APIs for real-time data monitoring and alert system.
Reduced manual monitoring effort by enabling automated gas detection.
- **SHOPPING MALL OWNER MANAGEMENT MODULE (Java, Spring Boot, PostgreSQL) [GitHub](#):**
Developed a backend module using Java and Spring Boot to manage and approve shop registration requests.
Designed REST APIs and integrated PostgreSQL database for efficient request processing and status tracking.
Improved workflow efficiency by automating approval processes and reducing manual data handling.
- **QUERY GEN AI -AN INTELLIGENT SQL ASSISTANT (FastAPI, React, MySQL, Python, NLP) [Url](#):**
Developed an AI-powered Natural Language to SQL system using Python and FastAPI for automated database querying.
Integrated Large Language Models with MySQL database to convert user input into secure SQL queries.
Enhanced database accessibility for non-technical users by enabling fast and accurate query generation.

Certifications

- Java FullStack: Issued by TNS India Foundation.
- CCNA: "Introduction to Networks", "Switching, Routing, and Wireless Essentials" : Issued by Cisco.
- SQL: SQL Basics Queries: Issued by Skillrack.

Coding Achievements

- Solved 55+ Data Structures and Algorithms problems on GeeksforGeeks platform.:
- Solved 400+ programming challenges on SkillRack.:

Achievements

- **Finalist:** Smart India Hackathon 2023 – Hardware Edition (Top 1,028 ideas out of 50,000+), Noida.
- **1st Prize-Paper Presentation:** At National-Level Technical Symposium at Mailam Engineering Clg.
- **2nd Prize- Ideathon:** Achieved 2nd Place in the Intra-College Ideathon Competition.
- **3rd Prize-Paper Presentation:** At National-Level Technical Symposium at Velammal College of Engg.
